FOR IMMEDIATE RELEASE

American Insulated Glass Announces Guardian Select® Fabricator Certification *AIG expands high performance fabrication capabilities for commercial building envelopes*

Atlanta, Ga. March 13, 2019—American Insulated Glass, LLC (AIG), a leading glass fabricator and wholesale distributor, announces the company is certified as an independent Guardian Select® Fabricator in Atlanta and Birmingham. With the recent acquisition of Innovative Glass of America (IGA), located in Charlotte, North Carolina— AIG can effectively meet the demand for Guardian SunGuard® Advanced Architectural Coated Glass from all three locations.

As an independent Guardian Select Fabricator, AIG will have access to Guardian Field Customer Engineers (FCE's), a full suite of online tools and other resources provided by Guardian Glass for evaluating, specifying and visualizing the various glass solutions available. In addition to design tools AIG will also have access to expert technical support for assistance with project wind load and thermal stress analysis, sustainability evaluations, Environmental Product (EPD's), Health Product Declarations (HPD's), and documentation of environmental performance.

“We are very pleased to have access to Guardian SunGuard coated glass products, a comprehensive range of low-E coating options to meet the most complex performance and design aesthetic requirements,” states Billy Blair, President and CEO of AIG. “We have made significant investments in purchasing state-of-art fabrication equipment and business technologies, while also expanding the AIG brand from two to five locations in 2018.” The company will continue to expand organically and through acquisitions to better serve new and existing customers.

About American Insulated Glass

American Insulated Glass is a leading fabricator and wholesale distributor with locations strategically located to serve the Southeast and Midwest regions of the country. Dedicated to both commercial and residential end markets, AIG specializes in custom fabricated solutions to meet the most stringent code requirements for energy efficiency, impact safety and fire-rated glazing. AIG also distributes a full range of mirror, decorative glass and other specialty glazing solutions to the glass trade and millwork industry. To learn more about AIG, visit www.aiglass.com.
